StudySphere AI – Your Smart Study Companion

About

StudySphere AI is an interactive chatbot designed to help students with learning, study tips, exam preparation, and educational questions.

Features

- Provides study tips and learning support.
- Helps students prepare for exams.
- Answers educational questions.
- Offers an interactive chat interface.

Technologies Used

- Python
- Gradio
- Google Colab

How It Works

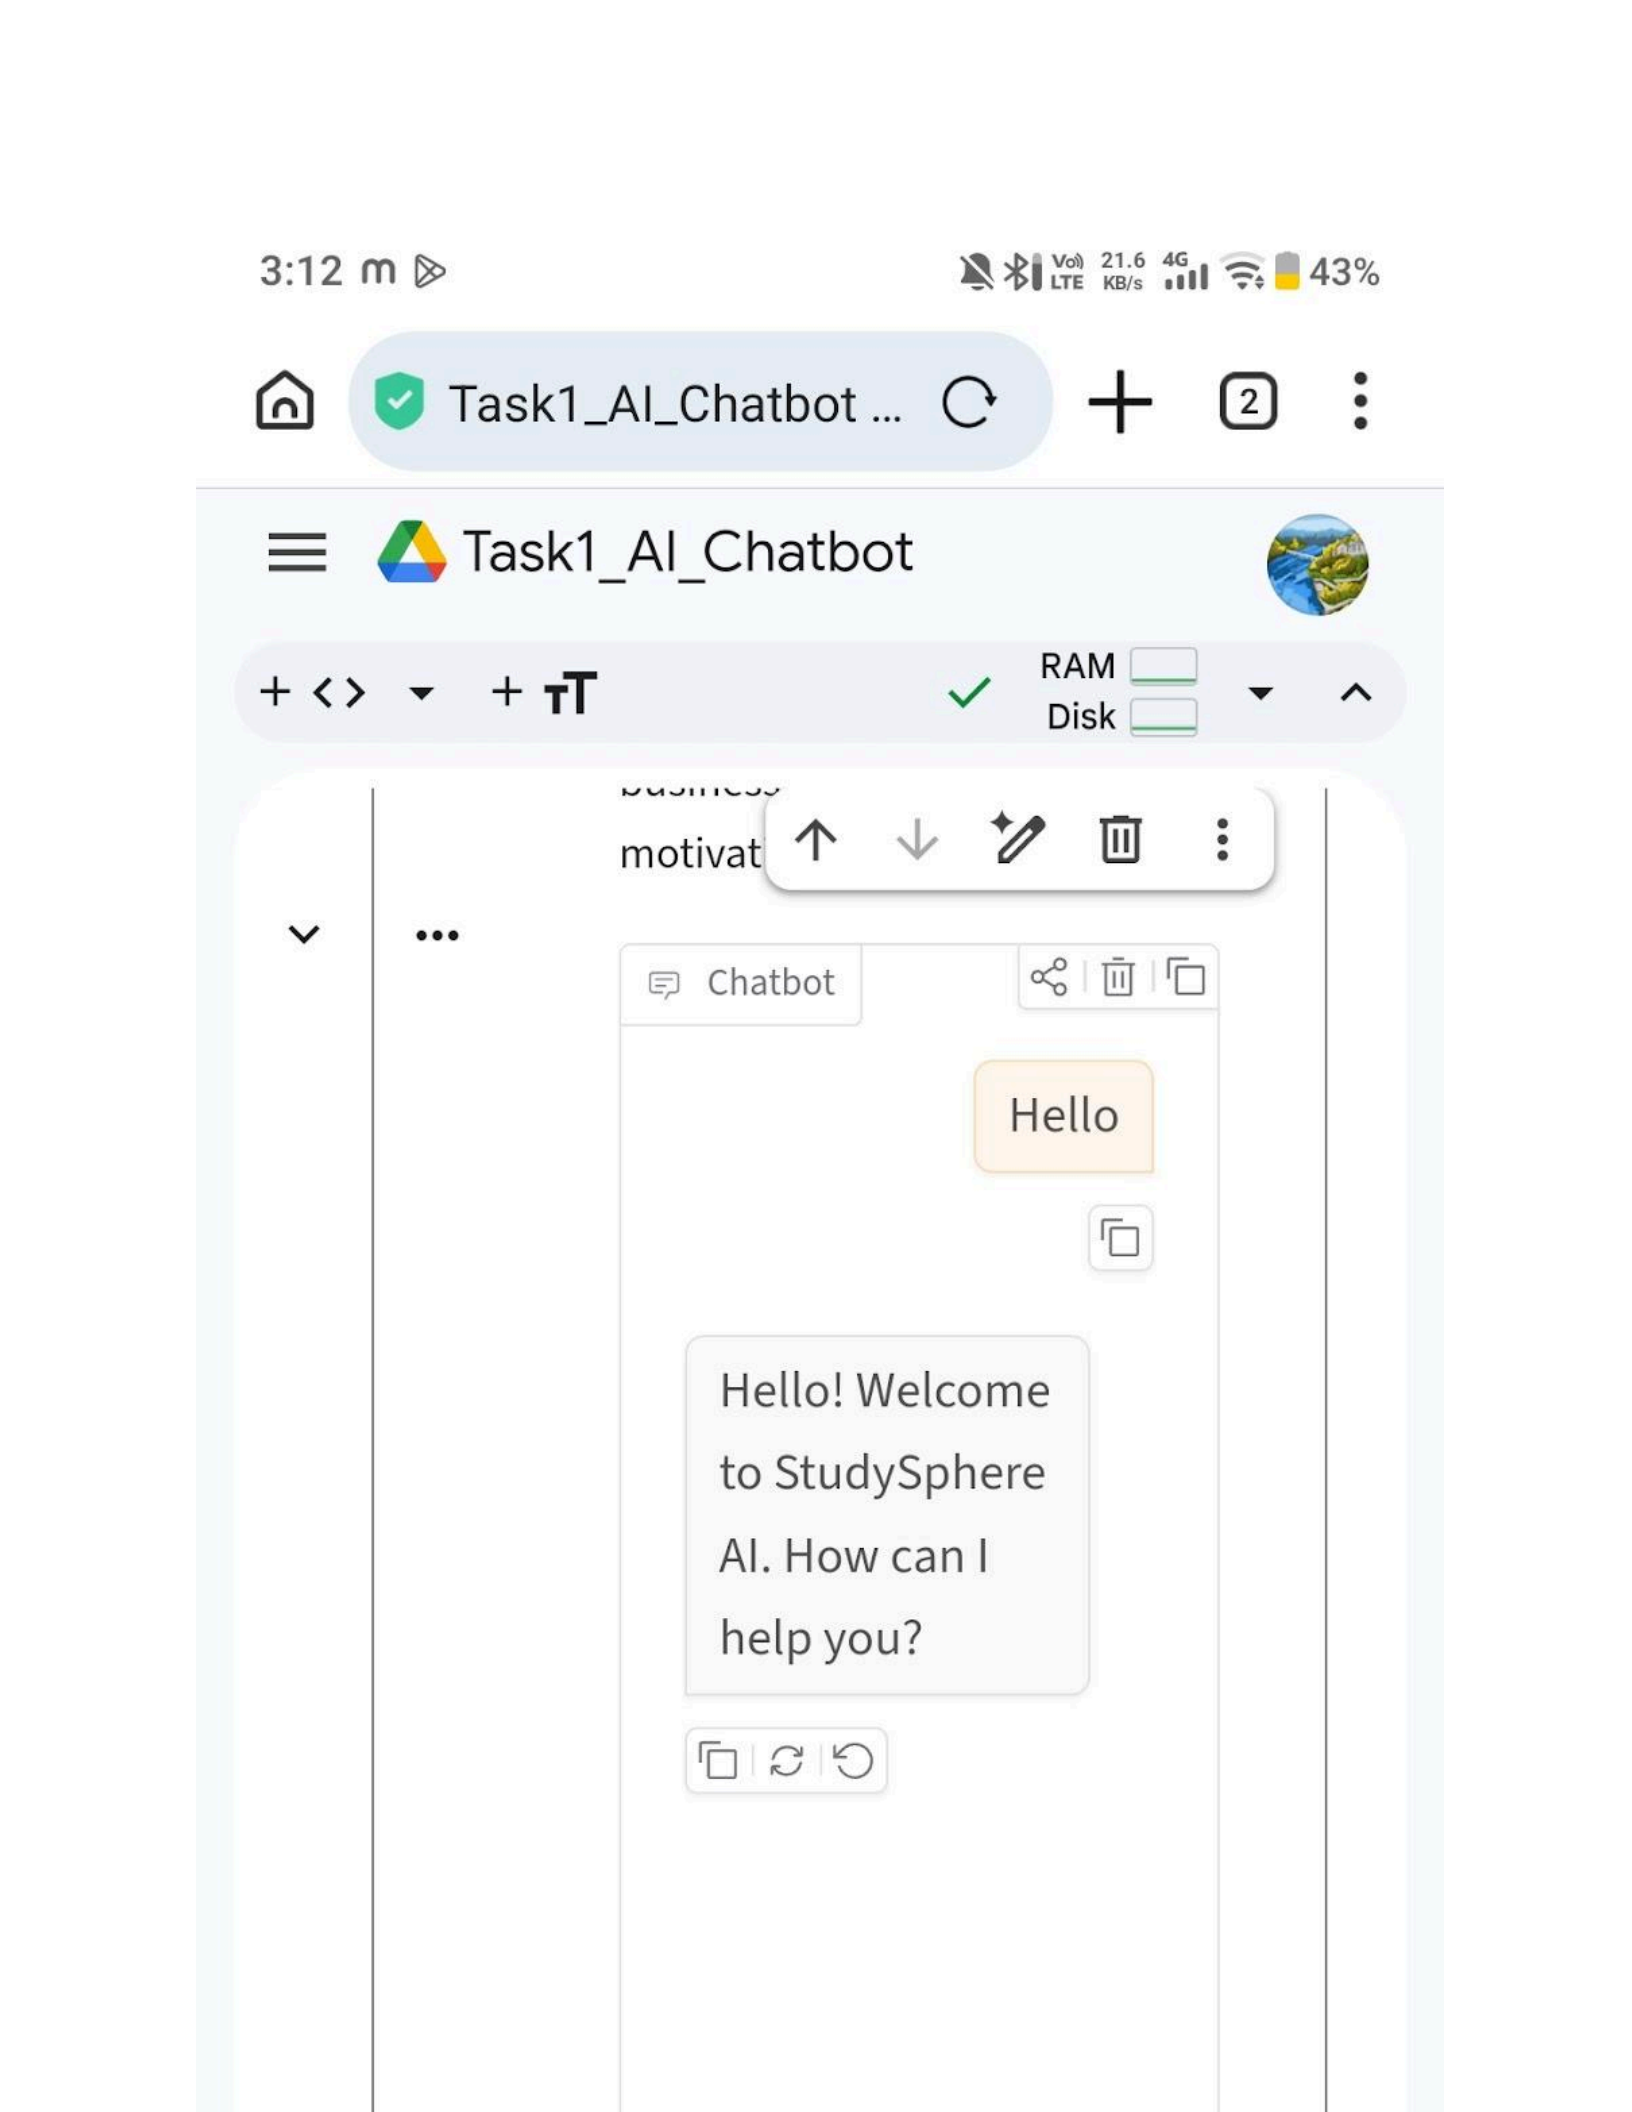

The chatbot processes user questions and provides relevant responses through its chat interface.

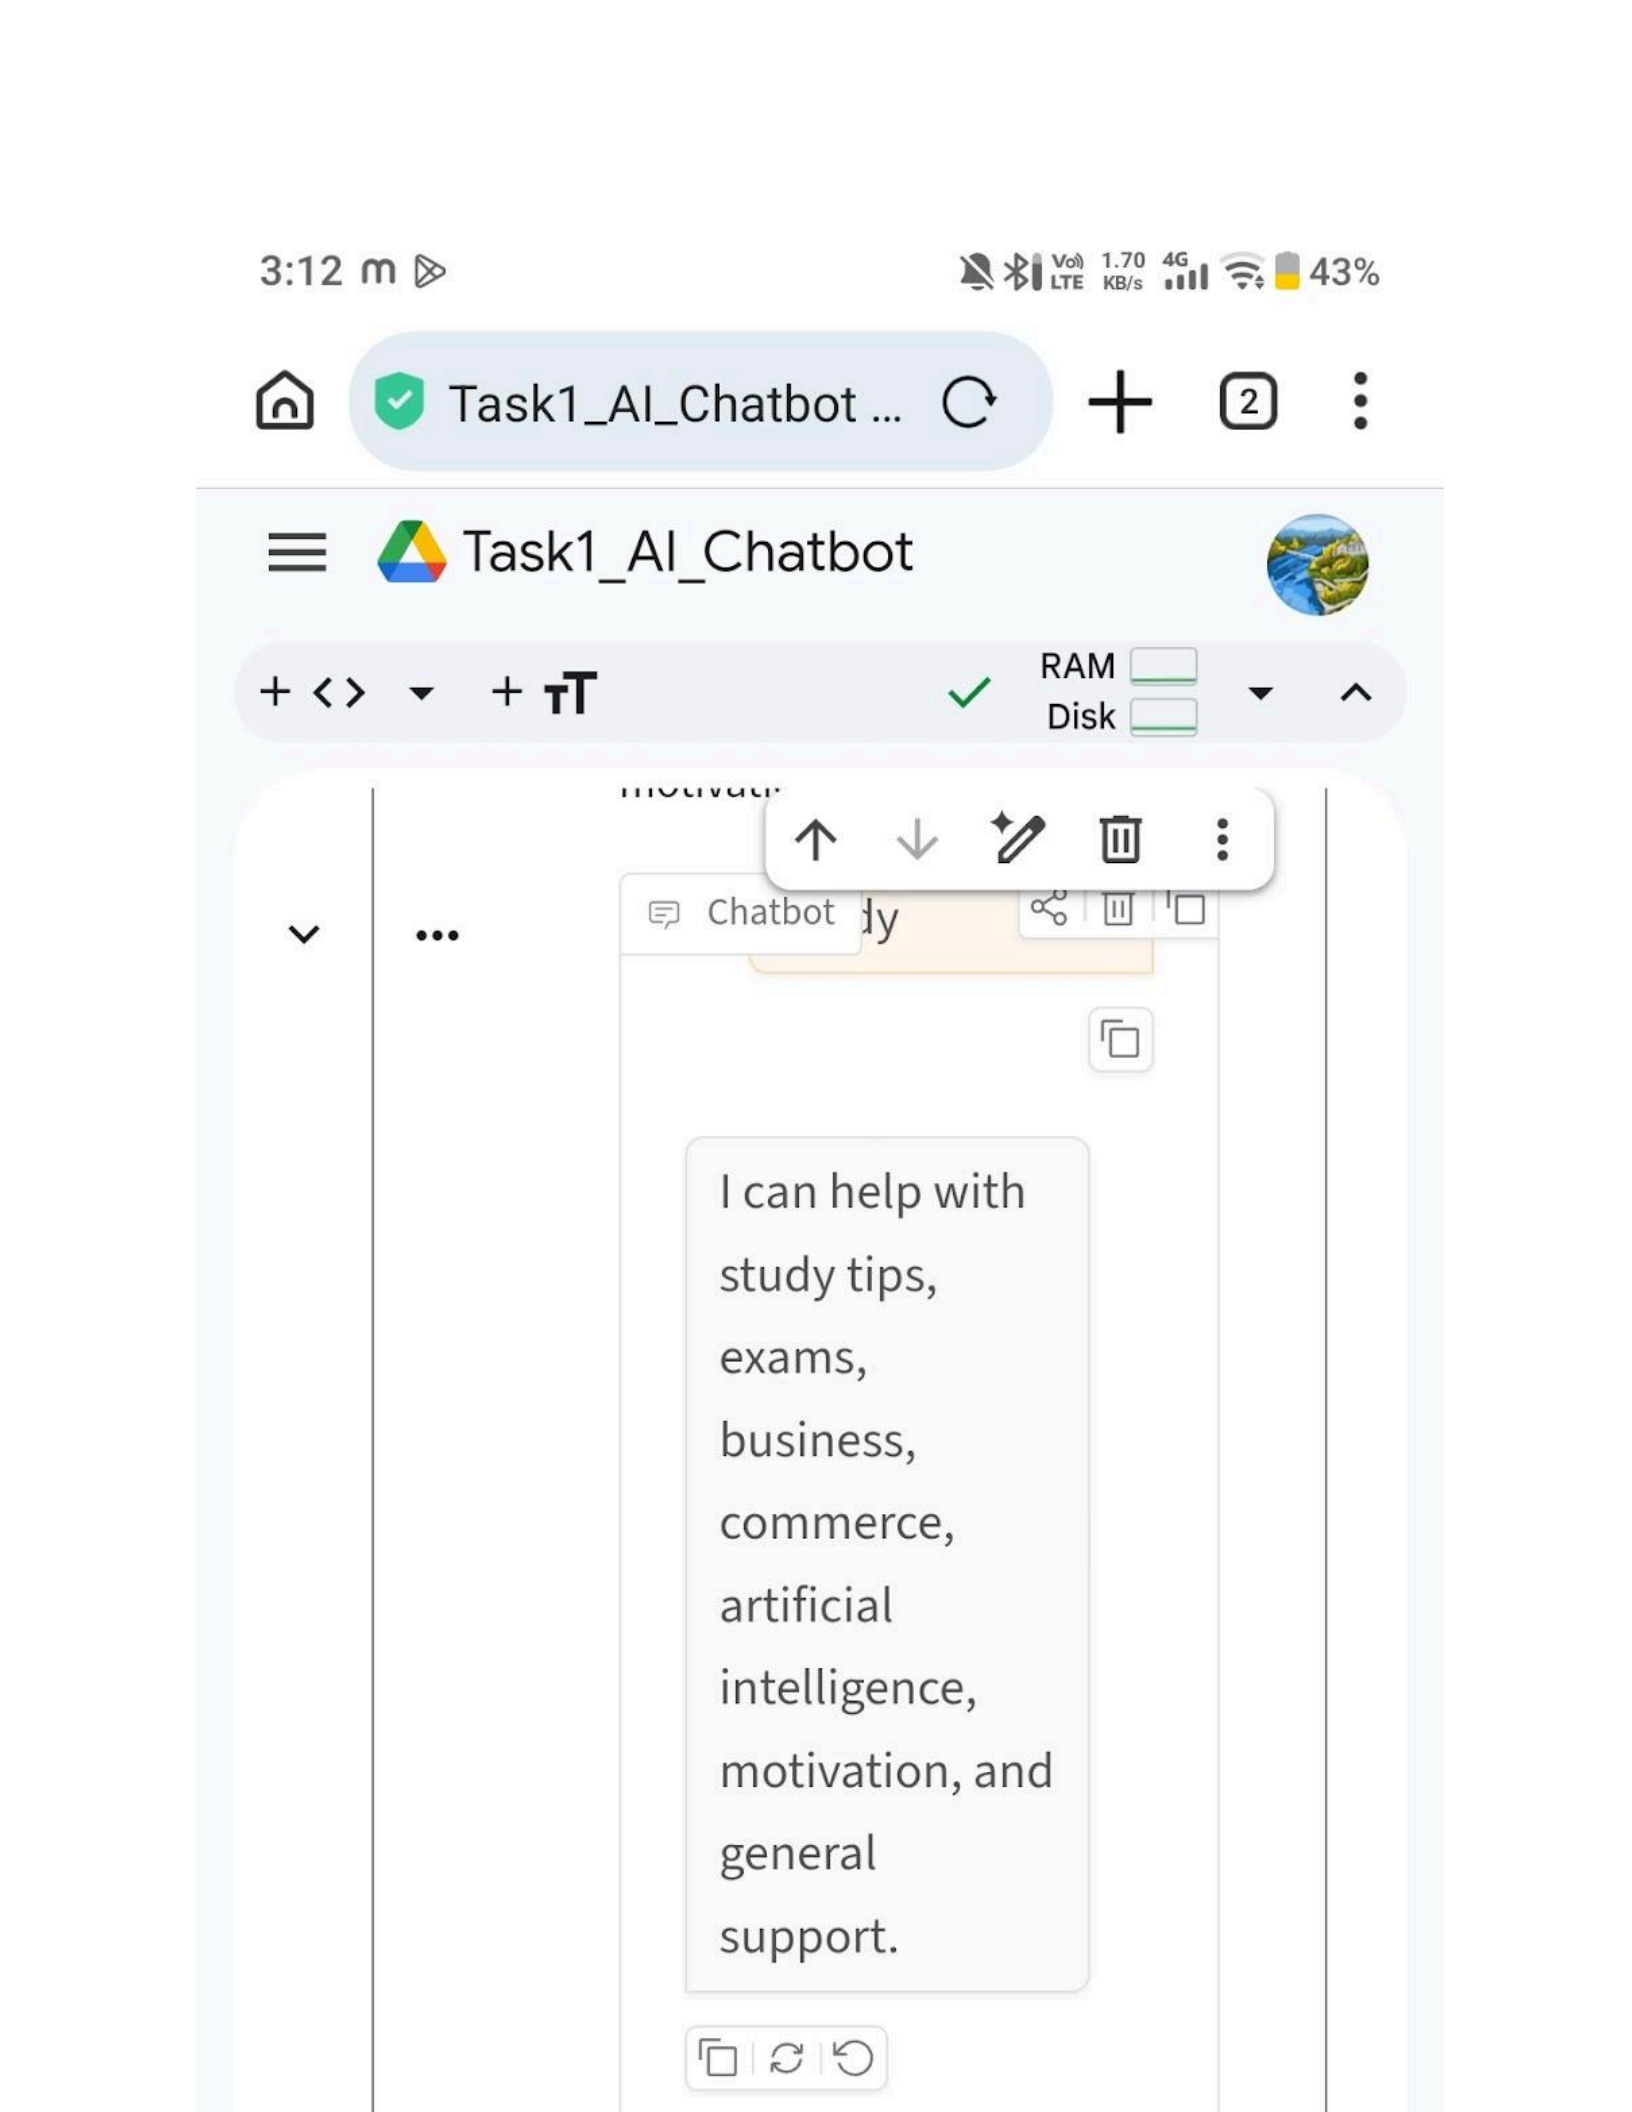

How to Run

1. Open the Google Colab notebook.
2. Run the code cells.
3. Launch the chatbot interface.
4. Start chatting!
